Forward-thinking Software Engineer with background working productively in dynamic environments. Fluent in front end technologies and front end programming languages used to develop software within finance. Proud team player focused on achieving project objectives with speed and accuracy.

## Work History

2016-11 -  
Current

### Senior Software Engineer

Cloudkaptan Consultancy Services Pvt. Ltd., Kolkata, West Bengal

- Worked closely with other business analysts, development teams and infrastructure specialists to deliver high availability solutions for mission-critical applications.
- Evaluated project requirements and specifications and developed software applications that surpassed client expectations.
- Checked client code for bugs and weaknesses using approved troubleshooting methods.
- Reviewed code and worked with development teams to correct problems, run test scenarios and prepare for deployment.
- Improved system performance by making proactive adjustments and resolving bugs.
- Coordinated with other engineers to evaluate and improve software and hardware interfaces.
- Worked with project managers, developers, quality assurance and customers to resolve technical issues.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Gathered and defined customer requirements to develop clear specifications for project plans.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Worked in over 6-7 projects, and in different technologies, preferably in AngularJS and NodeJS, which I have worked with for 3 years. I have also worked in projects with the MVC Framework using Scala, and Java for 2 years.
